

Chibuzor Emmanuel

SOFTWARE ENGINEER · BABCOCK UNIVERSITY · PORT HARCOURT, NIGERIA

+234 916 762 0192 | emmanuelchibuzor2005@gmail.com | chibuzor9.github.io/portfolio | github.com/chibuzor9
| linkedin.com/in/chibuzor-emmanuel

Skills

Languages Python · TypeScript · JavaScript · SQL · C++
Backend Node.js · Express · WebSockets · REST API design
Frontend React · Next.js (App Router) · Vite · Tailwind CSS · HTML/CSS
Data PostgreSQL · MySQL · MongoDB · Drizzle ORM · Prisma · Pandas · Polars · scikit-learn
Tools Git/GitHub · Linux · Docker · Vercel · Supabase · Microsoft Intune / Azure AD

Projects

ws-chat — Node.js, ws, PostgreSQL, Drizzle ORM, React, Vite, Tailwind CSS Jun 2026 – Sep 2026
SELF-HOSTED LAN CHAT SERVER WITH A HAND-ROLLED WEBSOCKET PROTOCOL github.com/chibuzor9/ws-chat

- Designed a 9-type JSON wire protocol shared by server and client from one module; the server stamps sender identity and timestamps itself, so clients cannot spoof either.
- Shipped direct messages, groups with join/leave, persisted history and last-seen presence, with client reconnect using exponential backoff capped at 30 s.
- Modelled the schema in four tables with a check constraint separating DM and group receivers, a partial unique index guaranteeing one admin per group, and transactional group creation so no ownerless group can exist.
- Fixed a race between membership writes and history reads by awaiting the handler chain, moving the ordering guarantee from network timing to the call stack.

AWAE7 — Next.js 16, TypeScript, Prisma, PostgreSQL, Supabase Auth, axe-core, Playwright, Tailwind CSS Feb 2026 – May 2026
AUTOMATED WEB ACCESSIBILITY EVALUATOR AGAINST WCAG 2.2 awae7.vercel.app · github.com/chibuzor9/awae7

- Built a full-stack platform that audits any URL or uploaded HTML against WCAG 2.1/2.2 A and AA using axe-core in headless Chromium, with an optional site crawl of up to 50 pages per run.
- Generates role-specific reports for developers, designers, auditors and end users, each with tailored depth, severity breakdown, remediation guidance and an overall score; exports to CSV, JSON and PDF.
- Persisted evaluations and per-violation WCAG criteria in PostgreSQL via Prisma, with Supabase authentication and a WCAG learning card deck; deployed serverless on Vercel with a warm-up cron to keep audits fast.

Experience

Halliburton Port Harcourt, Nigeria
JUNIOR SYSTEMS ADMINISTRATOR (INTERNSHIP) Jan 2025 – Jun 2025

- Rolled out Azure AD two-factor authentication, Microsoft Intune device management and conditional-access policies for Android and iOS, bringing devices into company-wide compliance and reducing unauthorized-access incidents.
- Provisioned and imaged workstations for new hires (domain joins, accounts, mailboxes) and configured wireless access points with MAC registration and static IPs for lab connectivity.
- Helped deploy VPN and Starlink links for field systems so remote drilling operations could reach internal resources securely; troubleshooted BIOS-level startup faults and endpoint recovery.
- Monitored and escalated support tickets and took part in global IT syncs covering server infrastructure and virtual network policy.

Education

Babcock University Ilishan-Remo, Nigeria
B.SC. COMPUTER SOFTWARE ENGINEERING Sep 2022 – Aug 2026

- First Class Honours.
- Google Developer Groups on Campus (2024 – present); Babcock University Computer Club (2022 – present).

Certifications

- Data Scientist Associate** — DataCamp
- Python Developer** track — DataCamp
- Intermediate Machine Learning** — Kaggle
- Python (Basic)** — HackerRank
